

MONONA GROVE SCHOOL DISTRICT

Board Policy 892.1

TEACHER TRAINING PROGRAMS

The Board believes that it is essential for the development of professionally trained teaching personnel that all school districts cooperate with teacher training institutions and provide the opportunities necessary for observation and practice teaching. Therefore, the district shall cooperate with training institutions that indicate by their planning and preparation that they are interested in providing a quality experience for prospective teachers and shall accept only those student teaching assignments to which it can dedicate sufficient time and talent to provide such experience.

In no way shall the district's participation in a teacher training program be allowed to detract from the quality of instruction which students receive. This requires careful screening of prospective student teachers and cooperating teachers as well as supervision and evaluation of the program.

The assignment of teachers to serve in a cooperating role shall be in accordance with state regulations.
